Borneo

vom 16.09. bis 01.10.2019

Borneo (Sabah)

16. Sep – 01 Oct. 2019

Borneo has one of the richest avifauna and flora on earth and our trip explores several different ecosystems, from the high Mount Kinabalu to the special lowland rainforest of Danum Valley. This will give us a chance to see the number of its endemic bird species.

We begin our visit at Rafflesia Forest Reserve in the Crocker Range, named after the largest flower in the world for which it is famous. It also allows a chance to see birds of mid-elevation specialties which are included Pygmy Ibon, Bornean Bulbul, Bornean Barbet, Fruithunter and Bornean Leafbird and Chestnut-hooded Laughingthrush and possible Mountain Serpent-eagle.

We then focus on the endemic of Mount Kinabalu that reaches a spectacular 4095.2 metres. This area is occupied by lush forest, and many fascinating bird species that are unique to the highlands of Borneo. The iconic 'Whiteheads' trogon, spiderhunter and broadbill are all found here, then continue to Sepilok with Bornean Bristlehead, and a delightful boat cruising at Kinabatangan River, home to the Proboscis Monkey, Storm's Stork, 8 species of hornbills, and the Bornean Ground Cuckoo. And a final place Danum Valley is the world's oldest rainforests. Based on Danum Valley Field Research station, we will enjoy some of the best lowland rainforest birding in the world; seeking out some of Borneo's lowland specialties, many good birds and Blue-headed, Black-headed and Blue-banded Pitta and more species of pittas, Great Argus, Bornean Crested Fireback, White-fronted Falconet.

Day 1 (16. Sep. 2019):

Flug EK 44 11:00 – 19:15 Uhr Frankfurt – Dubai

Flug EK 344 21:15 – 08:40 Uhr + 1 Dubai - Kuala Lumpur

Day 2 (17 Sep.2019):

Flug EK 3465 10:10 – 12:45 Uhr Kuala Lumpur – Kota Kinabalu

International arrivals into Kota Kinabalu, at late morning, we do afternoon birding at Mangrove forest if you are not so tired and willing to explore around. Night in Kota Kinabalu.

Day 3 (18 Sep. 2019):

Morning Drive to Rafflesia Reserve in the Crocker Ranger Mountain. This site, which is set at a lower altitude than Mount Kinabalu, gives us the chance to see several birds which are rarely recorded elsewhere. Our main targets in area are the localized Bornean Bulbul, Bornean Leafbird, Bornean Barbet and Mountain Barbet. Mountain Serpent Eagle, Red-breasted and Crimson-headed Partridges, Whitehead's Broadbill, Pygmy Ibon, Streaky-breasted and Whitehead's Spiderhunters, Bornean Treepie, Chestnut-hooded Laughingthrush, Blyth's Hawk Eagle and the Fruithunter are all fairly possible. Then continue to Kinabalu National Park we stay there 5 nights.

Days 4 - 7 (19-22 Sep. 2019):

At 4101 metres, Mount Kinabalu is the highest peak between the Himalaya and Papua New Guinea. montane forest, good range of diversity of plants, insects, mammals, amphibians, and most special - birds, many of them are endemic to the highlands of Borneo.

here we will look for the species which specialize in mount Kinabalu, Those are included Red-breasted and Crimson-headed Partridges, Mountain Serpent Eagle, Bare-headed, Sunda and Rufous-hooded Laughingthrushes, Mountain Wren Babbler, Bornean Stubtail, Bornean Swiftlet, Short-tailed Green Magpie, Fruithunter, the superb Whitehead's, Spiderhunters, Broadbills, and trongs and the Everett's Thrush.

we will walk up the low summit level to look for some specialist including Kinabalu Friendly Warbler, Mountain Black-eye and Pale-faced Bulbul.

We will also take a day trip to Poring Hot Springs, Here we will put effort to find Blue-banded and 'Bornean' Banded Pittas, Dusky Munia, White-crowned Shama, as well as one of Borneo's most difficult endemics, Hose's Broadbill. There are also a number of rare species including White-necked Babbler, White-tailed Blue Flycatcher, Yellow-bellied Warbler and Chestnut-capped Thrush.

Day 8 (23. Sep. 2019):

From Mount Kinablu to Danum Valley Field Research Center(DVFC), is a wonderful virgin forest for 130 million year where we spend 4 nights, is located in superb primary rainforest and great birding begins around the field station and an extensive trail around allows us to search good species of this lowland forest and mammals life are fantastic here which included Bornean Gibbon, Pygmy Elephant ...etc.

We stay at (DVFC) for four nights.

Day 9-11 (24-26 Sep. 2019):

we will have three full days focus on the specialities birds in this region, searching for are six species of resident pitta, including endemic Blue-banded, Black-crowned, blue-headed and 'Bornean' Banded Pitta, Bristlehead, Black-throated and Striped Wren Babblers, Bornean Wren-Babbler, Great Argus, Bornean Crested Fireback, Bornean flycatchers together with a fantastic number of , flowerpeckers, Spiderhunters, Malkohas, babblers, trogons, hornbills, Woodpeckers.

The area is also recorded as mammals which include Bornean Orang-utan, Red Leaf Monkey, Bornean Gibbon and possibly Pygmy Elephant. Night-birding is often seen Brown Wood Owl, Buffy Fish-owl and mammals may included flying squirrel, few species of civet, Leopard Cat if we are luck we could see Clouded Leopard.

If weather allow we will have two night drives and two night walks. On a previous trip we saw Asian Pygmy, elephant common palm Civet, Red Giant Flying Squirrel, Gould's and Large Frogmouth, Buffy Fish-owl.

Days 12 (27 Sep. 2019):

We spend our morning to look for some bird has miss from previous day at Danum Valley Field Research center, late morning we ready to depart to Kinabatangan town and on the way we stop at Gomantong Cave for seeing the Swiftlets then continue to Sukau village approximately arrive by 3:30pm, good time for cruising along the Menanggal river enjoy Hornbills, White-fronted Falconet, hopefully seeing a Storm's Stork, will put an effort to see the Proboscis Monkey and also and mammals including Borean Pygmy Elephant and Orang-utan. Two Nights at Kinabatangan River.

Days 13 (28 Sep. 2019):

Our main target Bird here is the Bornean Ground Cuckoo one of Borneo's specialist and often difficult to see birds, which has regularly been recorded here. As we cruise along the river and its tributaries in our boat we have the opportunity to observe many of the canopy birds that can be more difficult to see at Danum Valley, especially White-crowned and other Hornbills possible here. Also many raptors species such as Lesser and Grey-headed Fish-eagle, Jerdon's Baza and Wallace's Hawk-eagle can be found here, night bird possible Large Frogmouth and Oriental Bay Owl.

Day 14: (29 Sep. 2019):

Our final morning cruising at Kinabatangan river looking for our missing species of birds then heading to Sepilok we will spend the afternoon birding at Rain Forest Discovery Center, one of the best Canopy walk in Sabah. This area provides an excellent introduction to Bornean birds and while exploring a nice constructed canopy walkway we may have chance to see good number of Kingfishers, Black-crowned Pitta or the unique Bristlehead, Trogons, Makohas and some other good bird in Sepilok. Night at Sepilok. will do a night walk from (06-08 pm) to see the Red Giant Flying- squirrel and other birds if the weather allow.

Day 15 (30 Sep. 2019):

We spend all morning birding at Rain Forest Discovery Center searching for bird species we miss from the previous day, at noon we drive to Sandakan Airport for boarding to Kuala Lumpur - end the service

[Flug EK 3465 14:10 – 16:55 Uhr Sandakan - Kuala Lumpur](#)

[Flug EK 347 19:20 – 22:20 Uhr Kuala Lumpur – Dubai](#)

Day 16 (01 Oct. 2019):

[Flug EK 43 03:45 – 08:50 Uhr Dubai – Frankfurt](#)
